

2024 Summer Clerk Program

MINAMI TAMAKI LLP is now accepting applications for its 2024 Summer Clerk Program.

The Summer Clerk Program is a 10-week paid internship at Minami Tamaki's San Francisco office. Our Clerks work primarily on business immigration, employment litigation, personal injury litigation, and consumer and antitrust class actions. Summer Clerks perform extensive legal research and writing, and receive hands-on experience in case evaluation and management, client interaction, discovery practice, and trial preparation. Summer Clerks also have the opportunity to contribute to the firm's social justice work with numerous bar associations and community organizations.

The firm is seeking highly motivated and detail-oriented individuals who are genuinely interested in plaintiff-side civil litigation and/or business immigration work. Applicants must have outstanding academic credentials, strong legal research and writing skills, and excellent communication and interpersonal skills. We value Summer Clerks who have a demonstrated interest in civil rights and community service.

TO APPLY:

Interested candidates should e-mail a cover letter, resume, transcript, and writing sample to SummerProgram@MinamiTamaki.com.

No phone calls please.

The application deadline for the 2024 Summer Clerk Program is January 31, 2024.

About the Firm: Established in 1974, Minami Tamaki LLP takes pride in providing the highest quality legal representation with an emphasis on personalized service. Minami Tamaki has a strong and historical commitment to social justice and community outreach. The firm brings its deep background in civil rights work to its current practice in the areas of Consumer and Employment Rights, Personal Injury, Immigration, and Corporate and Nonprofit Counseling. The firm's culture is collegial and collaborative, but tenacious in its representation of its diverse clientele. Our attorneys combine outstanding lawyering skills with an ethical and progressive approach to solving our clients' legal problems.
